

# BiDirectional Multicast (IPv4)

---

Tim McConaughy  
Solutions Architect

@juangolbez    [carpe-dmvpn.com](http://carpe-dmvpn.com)

# Agenda

## Topics:

- Basic Operation of BIDIR-PIM

## Demos:

- Designated Forwarder Election
- BiDir State Tracking in Multicast

## Packet Analysis:

- PIM Hello (BiDir)
- PIM Join/Prune (BiDir)
- PIM DF Packets

# Globomantics Multicast Deployment Continues

# BiDirectional PIM: Why?

# Many-to-Many Multicast

# Many-to-Many Flows

# BIDIR-PIM (Green)

# BIDIR-PIM (Orange)

# BIDIR-PIM (Purple)

# Designated Forwarder

**Forwarding**  
**Forwards Multicast**  
**Up/Downstream on**  
**Segment**

**PIM Join**  
**Forwards PIM Joins**  
**Upstream for**  
**Segment**

**Local Delivery**  
**Delivers Multicast**  
**Locally to Receivers**

# Designated Forwarder Election

# Phantom RP

**No Source  
Registration**  
**No Source Tracking  
in BiDir PIM**

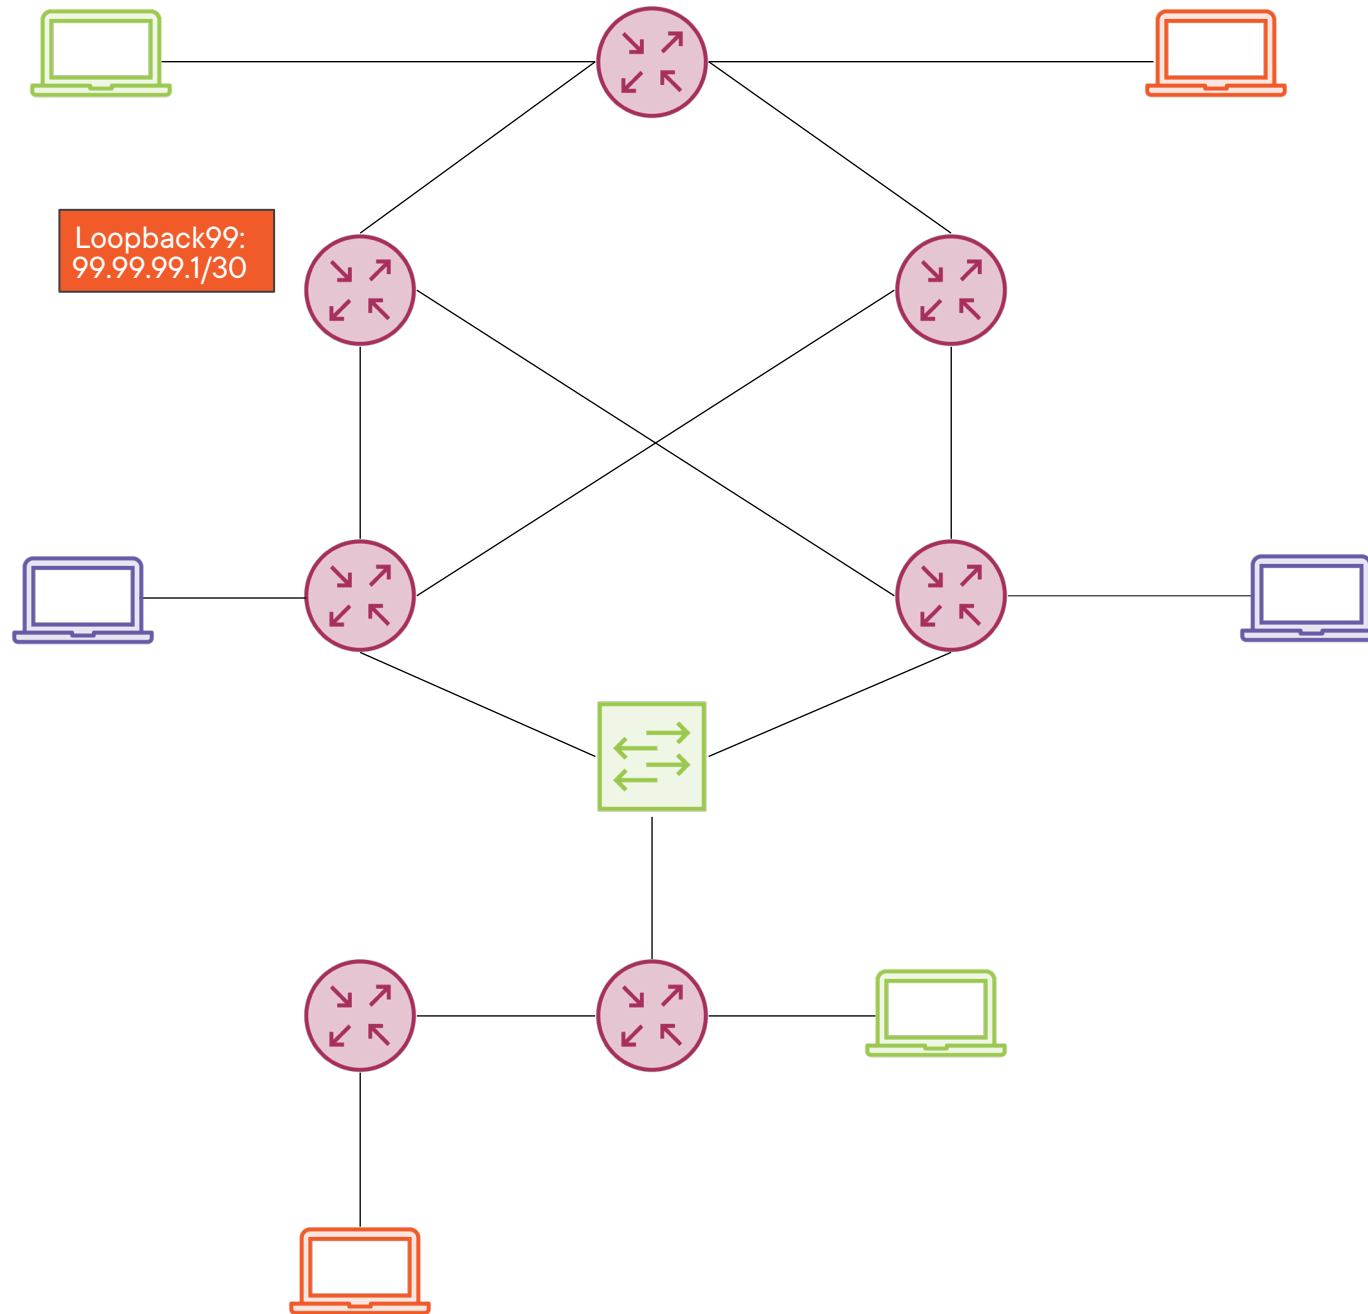

**No Source Join**  
**RP is the root of the  
shared tree**

**RP is Arbitrary**  
**RP Link is an agreed-  
upon point to build a  
shared tree**

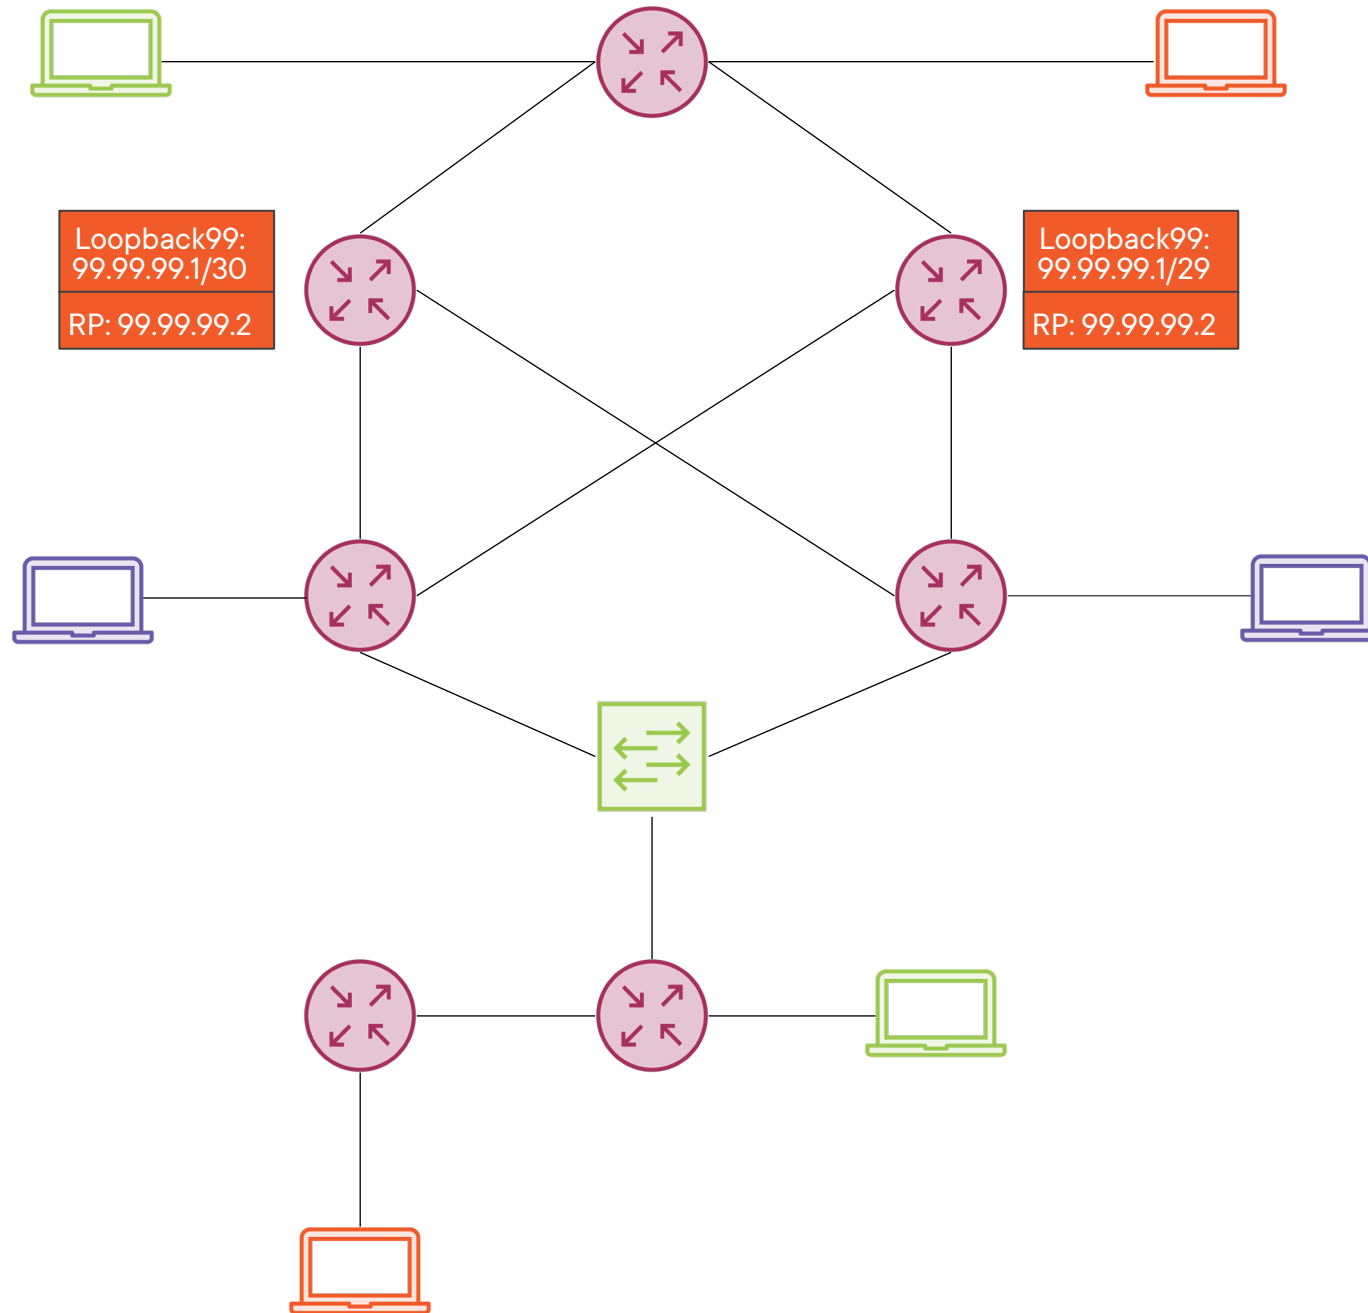

# Phantom RP

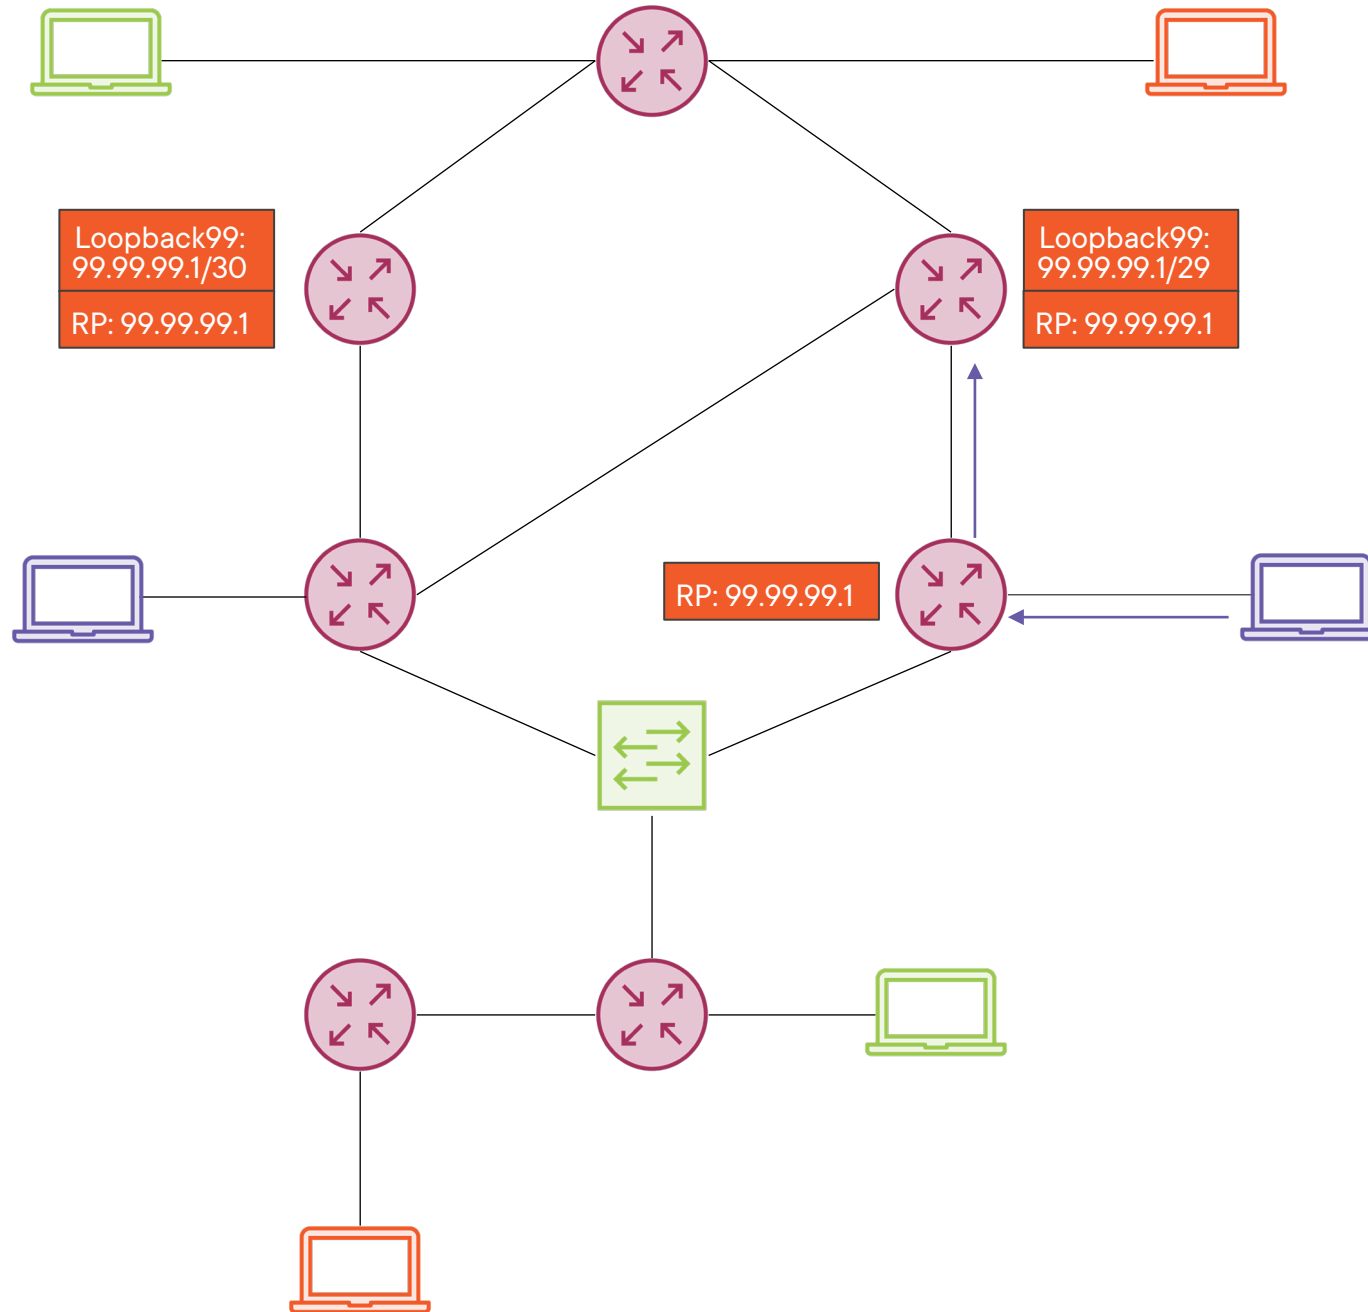

# Phantom RP

# Phantom RP

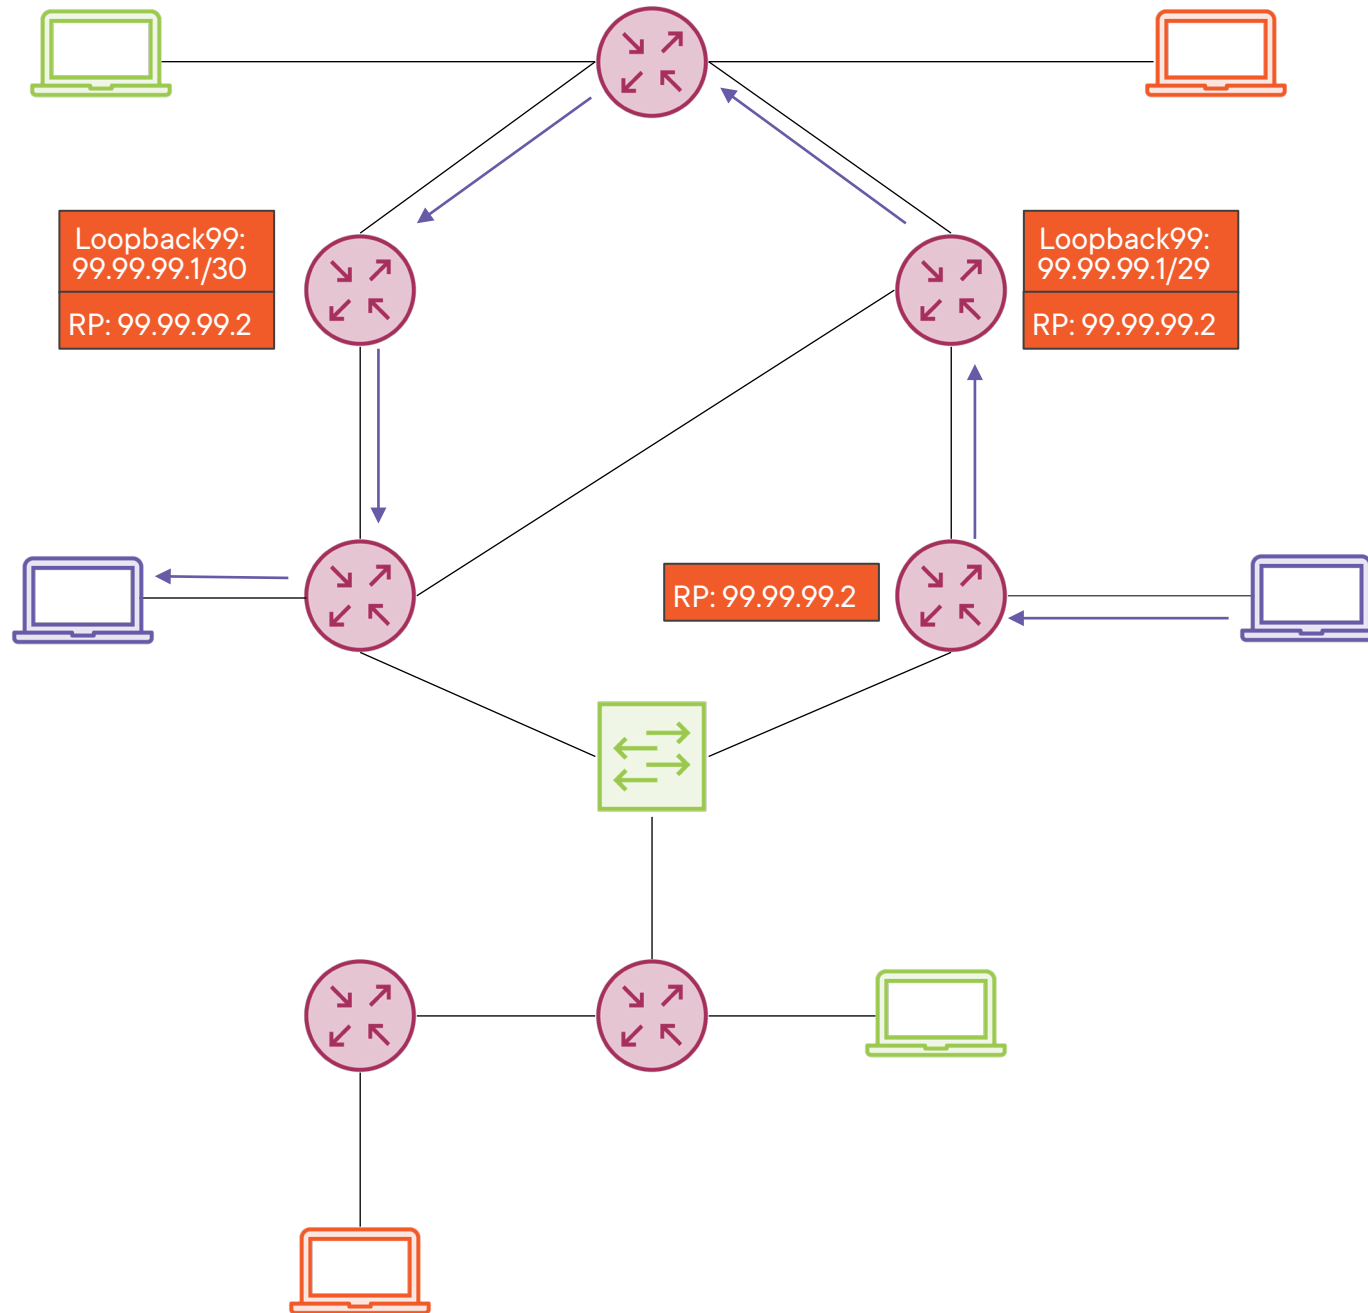

# PIM Join Hijack

# PIM Join Forwarded

# BiDir PIM Only Works If...

**Every Router Agrees  
on Same RP  
Address/Link**

**Source Traffic  
Forwarded Upstream  
to RP Link**

**PIM Joins Forwarded  
Upstream to RP Link  
to Build OIL**

# Demo

## **BIDIR-PIM Designated Forwarder Election**

- Debug DF Election
- Change Metrics to See DF Reconverge

# PIM Designated Forwarder Election

# Demo

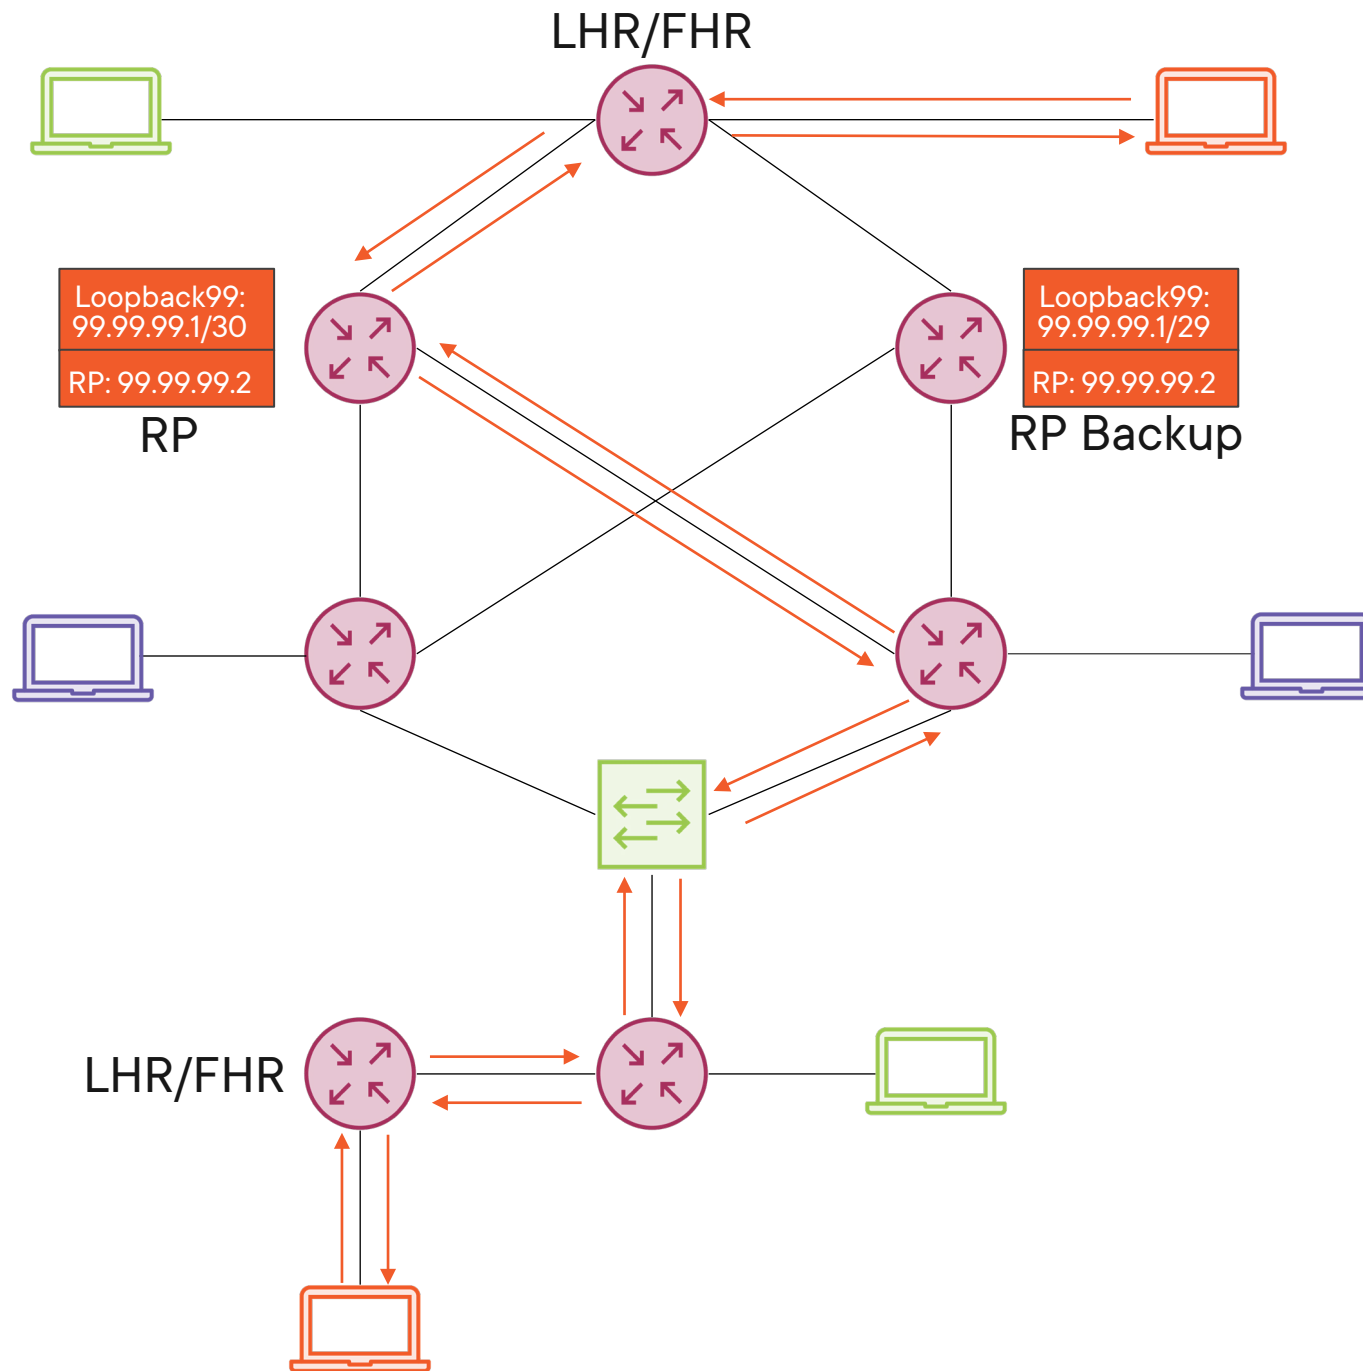

## **BIDIR-PIM Multicast State Tracking**

- Show IGMPv3/PIM Join from LHR
- Show Source Flow from FHR
- Show RP/Shared Tree Flow

# BiDir PIM State Tracking

# BiDir PIM Facts

**DF Election**  
**Like Spanning Tree**  
**Protocol**

**Rendezvous Point**  
**Can be a Link instead**  
**of a Router**

**Shared Tree Only**  
**No Source Tree and**  
**No Source Tracking**

# BIDIR-PIM (Green)

# PIM Hello (BiDir)

No.	Time	Source	Destination	Protocol	Length	Info
1	0.000000000	10.255.254.4	224.0.0.13	PIMv2	76	Hello

```
> Frame 1: 76 bytes on wire (608 bits), 76 bytes captured (608 bits) on interface eth0, id 0
> Ethernet II, Src: 50:00:00:02:00:00 (50:00:00:02:00:00), Dst: IPv4mcast_0d (01:00:5e:00:00:0d)
